

testing::Test

```
classDiagram
    class testingTest["testing::Test"]
    class LibrarysystemTest
    testingTest <|-- LibrarysystemTest
```

The diagram shows two class boxes. The top box, labeled 'testing::Test', has three horizontal compartments. The bottom box, labeled 'LibrarysystemTest', has three horizontal compartments: the top one contains the class name, the middle one is empty, and the bottom one contains two method declarations: '# SetUp()' and '# TearDown()'. A blue arrow with an open triangular head points from the top of the 'LibrarysystemTest' box to the bottom of the 'testing::Test' box, indicating that 'LibrarysystemTest' inherits from 'testing::Test'.

LibrarysystemTest

# SetUp()

# TearDown()
